nopCommerce Administration

The existing admin functions are used to setup a payment gateway

See https://docs.nopcommerce.com/en/user-guide/configuring/setting-up/payments/index.html

Installing the Plugin

The Afterpay package supplied can be uploaded and installed using the "Upload plugin or theme" button on the Configuration > plugins page.

Refer to Then the installation of the plugin follows the standard nopCommerce procedure. See <u>https://docs.nopcommerce.com/user-guide/configuring/system/plugins.html</u>

Alternatively, you can manually install the plugin:

- 1. Copy the Plugin to the correct directory
- 2. Restart the Application Click the Icon in the top

Once installed the you can configure the plugin.

Configure Settings

The settings for the plugin can be set using the configure page.

There are two tabs for plugin settings Operation Settings and Configuration Settings

Operation Settings

eration Settings Configuration Settin	gs			
Ensure that you comply with the Aftern	bay Merchant Agreement:			
- For example: Gift Cards are restricted fr	om sale via Afterpay.			
 Other product types are also restricted. 				
 Products can be restricted by adding th 	eir product tags below			
Restricted Product Mode 🕄				
Restricted Product Tags 🚱	giftcard ×			
Transaction mode 🚱	Payment	*		
Additional fee 🚱	0.0000	▲ ▼		
Additional fee. Use percentage 😮				
Enable Marketing Features 🚱				
Product Widget Zone Location 🚱	productdetails_overview_botto	m	~	
Checkout Widget Zone Location 🚱	order_summary_cart_footer		~	

Restricted Product Mode

When this mode is selected then products which have a **Restricted Product Tag** assigned will not use the Afterpay Payment method to allow payment for these products.

Restricted Product Tags

A list of the restricted product tags which are checked. Enter the tag values that correspond with tags that are applied to products.

If a product with the corresponding tag is displayed then Afterpay Payment method will not be available in the checkout. In addition the Product Widget will display the message "Afterpay is not available for purchasing this item"

Transaction Mode

There are three modes of operation for the plugin.

Payment – A payment is made and fully captured when the items in the shopping cart are checked out and an order is created.

Authorise and Capture – An authorisation is created when the items in the shopping cart are checked out and an order is created. At a later point the admin system can be used to captured funds or the authorisation can be voided.

Authorize (only) – An authorisation is created when the items in the shopping cart are checked out and an order is created. The funds can only be manually voided or captured via the Afterpay Merchant System.

Select the desired mode of operation.

Additional fee

This is an amount to add to all order Totals to charge an additional fee to carry out the transaction.

Additional fee. Use percentage

This is a percentage amount to add to all order Totals to charge an additional fee to carry out the transaction.

Enable Marketing Features

Click this checkbox to enabled the marketing features which will then be visible on the website. See details below.

Product Widget Zone Location

Select the widget location for the display of the Afterpay Product Widget – See more information below

Note: The only widget zone Afterpay will approve at present is Product Price Bottom

Checkout Widget Zone Location

Select the widget location for the display of the Afterpay Checkout Widget - See more information below

After entering the settings click Save.

The above Merchant Settings are provided by Afterpay Merchant Administration.

Instance Id

Typically, this is just a free text field to set to the name of the Label Name for the Configuration being used it has no function in making payment transactions.

Merchant Id and Merchant Client Secret

Supplied from Afterpay Merchant Website (See details below)

API Endpoint and Screenflow Endpoint

Enter the correct website addresses in the fields as required for either Sandbox Mode or Production Mode.

Environment	API Endpoint	Screenflow Endpoint
Production	https://global-api.afterpay.com/v2/	https://portal.afterpay.com/afterpay.js
Sandbox	https://global-api-sandbox.afterpay.com/v2/	https://portal-sandbox.afterpay.com/afterpay.js

Afterpay Version

This is the current version of the gateway software in use. Default value is v2

Test Mode

Selecting this option allows you to test the plugin and log process information in the system log. This option is used to test the plugin within nopCommerce it does not change the Afterpay Gateway operation.

To change the operation of the gateway from sandbox mode to production mode change the Website Addresses above to the production website addresses.

De-select the nopCommerce Test Mode to use the plugin in live payment mode.

Send Transactions to Gateway

When the option is <u>not</u> selected, the plugin does not send transactions to the production gateway and certain parts of the plugin are bypassed to enable tests withing nopCommerce to be carried out.

Select this option when you have tested the plugin and are ready to send transactions to the Afterpay Payment Gateway.

Purchased Licence Keys

When you first install the plugin Demonstration keys will be automatically generated. The plugin can be operated in demo mode for 14 days. The purchase licence keys will be provided via email normally within 1 day after purchase. The purchase licence keys can then be entered as follows:

Public Key

This is the plugin licence public key provided. When you first install the plugin a Demonstration key will be saved. Change this value to the Public key suppled in the email when received.

Private Key

This is the plugin licence public key provided. When you first install the plugin a Demonstration key will be saved. Change this value to the Private key suppled in the email when received.

Enable Plugin

Configure Afterpay Gateway - Enable / Disable
